

Education

The new community will need new schools, just as it will need other types of supporting infrastructure.

The Application includes provision for up to three primary schools and one secondary school. The way these schools would be built out would be agreed with the Local Education Authority.

Our principle when approaching education provision is to ensure that the needs of future occupiers of the SUE site can be met without impacting upon any of Rugby's existing schools and facilities.

At the same time, schools play an important part in fostering community cohesion and we would want to ensure that schools are developed early to meet the needs of the early occupiers of the site.

These schools would also be multi-use, modern spaces serving the community throughout the day and the evening, not just during lesson time.

“ This has the potential to be a very exciting project. We just need to get it right! ”
