

Our Masterplan is based on the detailed discussions we have held with stakeholders and the community since 2003.

It draws on technical assessments and our team's professional understanding of the site combined with all of the feedback we have received during eight years of preparing the scheme. This culminated in the 2009 Design Enquiry where more than 240 members of the public attended and more than 60 people from 30 local, regional and national organisations provided their input.

Importantly, the Design Enquiry also gave local people the opportunity to help directly shape the scheme.

This Masterplan shows the SUE site and our proposed redevelopment. The scheme is for a distinctive and sustainable community which is linked directly into Rugby and looks to Rugby Town Centre as its primary centre.
